Width: approx 1.9 cm	
Length: approx 25cm	

# Athrodax Bendable Foot & Arm Boards

The Athrodax arm board provides an advantage over other line fixations. Easily shaped to the desired gentle curve of the infants wrist or heel. It allows a natural positioning & secures comfortably, preventing catheter movement. The Armboard securely positions the hand or foot for the infant while inserting & monitoring of arterial lines in the Baby Care unit, on the ward or in theatre, adjustable hook and loop fasteners ensure a snug fit. Made with a durable comfysoft material surround.

- **Latex Free**
- **Secures & positions the hand, wrist or heel, preventing unwanted movement**
- **Bend to desired shape along the wrist or heel**
- **Comfysoft material outer covering**
- **Hook & loop secure fasteners**
- **Secure thumb for wrist extension and better access to radial artery**
- **Armboard suitable for peripheral IV lines**

Size	Quantity	Code
Paediatric (Medium)	10 per box	ATH651
Neonate (Small)	10 per box	ATH652
